

ABSTRACT OF THE DISCLOSURE

A working vehicle includes a vehicle body, a radiator mounted on the vehicle body, and a hood provided at a front portion of the vehicle body for covering the radiator. The hood includes a hood body, a front-face grill portion provided at a front face of the hood body for introducing ambient air to the interior of the hood and a pair of side-face grill portions provided at right and left side faces of the hood body for introducing ambient air into the interior of the hood. A rectifier member is provided for controlling the flow of ambient air introduced from a rear portion of the side-face grill portion.
